When you book a flight and pay in full at the time of booking, we issue your flight tickets immediately. This provides the security of knowing you have a valid ticket for travel. A charge for Airline Failure Protection is made on all flight bookings so that in the event the airline ceases to trade, we are able to arrange alternative flights (if available), or issue you with a refund, as appropriate.

This flight is sold as Agent of the Airline(s) named on the ticket and is not protected under the ATOL scheme.

### IMPORTANT NOTICE:

This is an important document you must retain this as you will need it if your travel arrangements are protected under a scheme of financial protection and you need to make a claim.

If you are travelling to the United States you will need to complete the enhanced security entry requirements using the online visa waiver form (<https://esta.cbp.dhs.gov/esta/esta.html>), failure to do so will result in denied boarding.
